# **BIER DISTILLERY SPIRIT AND COCKTAIL MENU**

## WELCOME

With a name like Bierling, what other pursuit could be possible than something that involves grain and yeast? From a long line of bakers and brewers, we were looking for a way to put our stamp on a family tradition. Distilled spirits were the answer. Then the real work began. Formulations and recipes were developed to get the target taste profile from each spirit. Bottles were ordered, labels were designed, knuckles were scraped. The dream became reality. We now produce an expanding line of spirits, beer, and wine at our distillery.

Enjoy!

## JOEL & SARA BIERLING

### A NOTE ABOUT STRAWS:

Millions of plastic straws are used each day, clogging our landfills and polluting our waterways. We don't want to be part of the problem. To produce less waste, we will now be using either biodegradable clear straws made from corn or Hay Straws made from the shaft of the wheat plant. Hay Straws have been tested by the University of Nebraska Lincoln, Food Allergy and Resource Program and have a low gluten reading of 8pp, which is classified as gluten-free. (For a product to be classified as gluten-free the ppm reading must be under 20 ppm.) Hay and grass allergens can vary person to person. If you suffer from severe allergies to hay or grass, we recommend you consult your allergen specialist before using. Feel free to ask your server for an alternate straw.
